

TEST RESULT SUMMARY

Application Name:	DATI	Company name	SIRE
Application UID:	0x2000D67B		
Application Id:	60910	Date:	Jun 24 th , 2009
Terminal:	Nokia N79	Test Ref:	STH_7383
Test Round:	1	Status:	PASS

1. SUMMARY REPORT

Test Case Check List

- 1) Fatal errors: 0
- 2) Non-repeatable errors: 0
- 3) Observations: 0
- 4) General comments: 3

Test Reference	Test Summary	Result
UNI-01	Installation, Normal and Stressed Usage	PASS
UNI-02	Service Interruption	PASS
UNI-03	Low Memory Startup	EXCEPTION
UNI-04	Low Storage Memory During Startup & Execution	PASS
UNI-05	System Events and Task List Compliance	PASS
UNI-06	Application Functionality In Between Device Reboots	PASS
UNI-07	Backup and Restore Compliance	N/A
UNI-08	Uninstall	PASS
UNI-09	Reinstallation and mass memory storage	PASS
UNI-10	Scalable UI Compliance	N/A

UNI-11	Correct Auto-start Behavior	N/A
CAP-01	Applications do not interfere with voice calls	N/A
CAP-02	Telephony UI Application Control	N/A
CAP-03	Manufacturer Disclaimer for VoIP Applications	N/A
CAP-04	Active VoIP call and notification of an incoming GSM/UMTS call	N/A
CAP-05	Emergency Call When VoIP Application is Open	N/A

2. FATAL ERRORS

None

3. NON-REPEATABLE ERRORS

None

4. OBSERVATIONS

None

5. GENERAL COMMENTS

- 1) We performed full testing against **Symbian Signed Test Criteria V3.0.3**
- 2) **UNI-03 (Symbian OS v9 onwards only):** TOOL2 is currently unavailable for Symbian OS V9. Until such time as Symbian makes this tool or an equivalent available, this test should be waived automatically.
- 3) **DATI** is a usefully tool, nicely implemented on **Nokia N79** device. We think it will satisfy all the conditions that a SymbianSigned application must match. So congratulations, it can be Symbian Signed.
